PROFESSIONAL SUMMARY

Versatile and results-driven Full-Stack Web Developer and Google Student Ambassador with a robust foundation in Data Structures & Algorithms (DSA) and Object-Oriented Programming in Java. Proven experience building production-ready web platforms and mobile applications, highlighted by an engineering internship at IMINTRAINZ. Highly adept at designing clean backend structures, implementing modern API endpoints, and constructing responsive UI components to solve practical workflows.

TECHNICAL SKILLS

Core Computer Science:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)
Languages:	Java, Python,JavaScript, HTML5, CSS3 (Basics)
Frameworks & Tools:	Firebase, Git, GitHub, VS Code, Jupiter
Core Competencies:	Full-Stack Web Development, RESTful APIs, Database CRUD Operations

PROFESSIONAL EXPERIENCE

IMINTRAINZ | *Web Development Intern*

- Collaborated on configuring, testing, and deploying responsive, user-centric web platforms utilizing modern frontend technologies and backend frameworks.
- Applied foundational Data Structures & Algorithms to enhance software processing speed, minimize redundancy, and isolate/troubleshoot production bugs.
- Engaged daily with professional version control patterns via Git/GitHub, agile environments, and direct application architecture workflows.

KEY PROJECTS

Text-to-Image Generation Platform (Mini Project)

- Engineered a full-stack generative AI web interface using Django and Python, managing user workflows from secure authentication to image storage architecture.
- Integrated dynamic machine learning cloud APIs to interpret visual text-based prompts and generate scalable, high-resolution downloadable assets.
- Crafted an interactive, clean presentation layout utilizing customized styling scripts to display responsive history metrics and asset management tools.

Personal Finance Tracker (Major Project)

- Developed an interactive single-user data utility web solution designed to monitor continuous transaction records, budget configurations, and structured income data.
- Leveraged optimized search and sort structures to accurately organize, isolate, and recall transactional logs chronologically or via cost categories.

- Established secure structured database schemas handling dynamic CRUD functions synced instantly to frontend styling layers designed with clean HTML/CSS.

CERTIFICATIONS

- Coursera Professional Certifications (Python / Data Structures Core Competencies)
- freeCodeCamp Verified Certification (Responsive Web Design / Full-Stack Paradigms)
- Cambridge Assessment English Certification (Advanced Written & Verbal Business Communication)

LEADERSHIP & ACTIVITIES

Google Student Ambassador / Campus Representative

- Spearheaded technical open-source workshops and peer coding circles on campus to facilitate hands-on learning with cloud infrastructures and modern frameworks.
- Served as a core collaborative community channel, organizing peer hackathons and evangelizing developer tools to an ecosystem of technical students.

EDUCATION

I'm pursuing Bachelor of Technology (B.Tech) in CSE-Artificial intelligence and machine learning(IV-YEAR) UnderGraduate (2027)

Mallareddy college of engineering and technology, Maisammaguda, Hyderabad,medchal,500100, Telangana

LANGUAGES

English (Professional Working Proficiency) • Telugu (Native Proficiency) • Hindi (Conversational Proficiency)
